*JLE/AH Summer
Program*

How can we spread positivity?

- ✘ Students from our ILE/AH Remote summer program learned about how things on Earth including people, animals and plants are all connected. They learned how important it is to think about the things that we do and how it effects others.
- ✘ Here are some cartoon examples from many different languages that help explain or share ideas about spreading positivity such as:
 - + Helping others
 - + Taking care of our planet
 - + Sharing, spreading kindness

A child's drawing on a textured paper background. The central focus is a large tree with a thick, brown trunk and a green, leafy canopy. A girl with a round face, large eyes, and a red dress is standing at the base of the tree, holding a red apple. Several other red apples are scattered around the tree, some hanging from thin branches. To the left of the tree, a yellow chicken with a red comb sits on a nest of green grass. The background is a light blue sky with white clouds. Several speech bubbles contain text in both English and Romanian. The overall style is simple and expressive, typical of a child's artwork.
